

# CONETASTIC!

## WE DESIGN AND BUILD THE MOST ADVANCED CONE TRUCKS IN THE WORLD

The leading providers of CPT services trust MARL Technologies to design and build the most advanced cone trucks in the world.

We work with each client to design a unit specifically suited to their carrier. We are proud of the fact our trucks have been used in record setting CPT investigations.

Typical features found on a MARL CPT truck include:

- Steel rigid body construction
- Insulated body with HVAC
- Custom height options for bridge clearance
- Engineered push point
- Stairs entryway integrated into body
- Stainless steel counters and cabinets
- Interior and exterior tool boxes
- Bathroom and black water tank option
- Electronically controlled valves with manual operation accessibility
- Outside connections for seismic hammer triggers
- Customizable to integrate different CPT systems
- Backup camera and sensors
- Adjustable automatic CPT push rate
- One button push to pull rod out of ground
- Fuel-Saving automatic throttle
- Optional auger drill and direct push hammer
- Automated one-button rig levelling
- Adjustable setting for automatic seismic hammer power
- Diagnostic interfact
- Integrated water ballast tanks
- Water heater
- Interior and exterior lighting options
- Shorepower connection

Call us to discuss your project, and see how we can put our extensive CPT experience to work for you!
